DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ronald Ward Reg. No. 54,870 on November 19, 2010.

Please amend claim 23 by replacing section (e) as follows:

(e) trigger logic configured in a first analyzer mode to trigger an action based on a match between any one of said plurality of data patterns and said replayed activity, wherein said trigger logic is further configured to latch address information of said match to a storage area, wherein said storage area is a FIFO, wherein the trigger logic includes a trigger sequencer that uses a state machine architecture configured to change states, wherein each level of the state machine can enable any or all of the other levels upon exiting the level, and wherein the trigger logic allows a user to program the trigger sequencer to enable different states.

Allowable Subject Matter

2. Claims 1-6, 8-9, 11-15, 23, 27-37, 39-41, 43-64, 66-72, and 87-91 are allowed.

The following is an examiner's statement of reasons for the allowance:

The examiner deems claims 1-6, 8-9, 11-15, 23, 27-37, 39-41, 43-64, 66-72, and 87-91 as novel when read as a whole for the limitations of an analyzer for capturing

activity on a transmission medium comprising: a signal conversion logic to convert input data from the transmission medium to a signal type used by the analyzer; control port to control modes of operation of the analyzer and accept user-defined patterns of activity for triggering; replay logic to select one of the transmission medium activity or the stored activity to output to trigger logic wherein trigger logic uses a state machine configured to change states and each level of the state machine can enable any or all of the other levels upon exiting the level; and wherein trigger logic is configured to compare a pattern of activity received by the replay logic with a first user-defined pattern of activity and to indicate when the comparison results in a match.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Loan Truong whose telephone number is (571) 272-2572. The examiner can normally be reached on M-F from 10am-6pm.
